PROFESSIONAL EXPERIENCE

Work Experience

Tech Mahindra | March 2024 - June 2024

- Gained exposure to real-world software development environments.
- Practiced frontend and backend fundamentals.
- Collaborated with teams to understand agile workflows and basic software lifecycle.

Academic Project

Multi-Model Emotional Detection System

- Developed an integrated emotion detection project utilizing machine learning techniques.
- Analyze facial expressions and eye state from key pointers and voice analysis from wave file.
- Achieved an accuracy of over 85% in classifying emotions including happiness, disgust, sadness, anger, neutral, and surprise.

Projects

Amazon Clone (UI) | HTML, CSS, JavaScript

- Designed a responsive UI replicating Amazon's layout and product listings.
- Implemented navigation bar, product cards, and structured page design.

YouTube Clone (UI) | HTML, CSS, JavaScript

- Built a video content UI similar to YouTube.
- Focused on grid layout, sidebar menu, and mobile responsiveness.

Todo List App | HTML, CSS, JavaScript

- Developed a simple task management app with add/edit/delete functionality
- Practiced DOM manipulation and local storage
